Short story about traineeship at the University of Padova

Our adventure lasted two months (July and August). The purpose of the trip was traineeship, and also to spend a vacation of a lifetime. And we did it! It was a wonderful time. We had the opportunity to learn about Italian culture, try their delicious dishes known all over the world, enjoy coffee, and admire the wonderful architecture. Italians are very open and sociable so everyone feels good there. We had a traineeship at the University of Padova, where we had the opportunity to participate in an interesting project for UNESCO LaSII and IGCP 641. We have created interactive maps for these projects, and met many wonderful people during our work. The location of Padova is great to do some sightseeing and get some rest. We spent our free time at the seaside 40 km from Padova and traveling. We had the opportunity to see a very large part of Italy. Going abroad for traineeship was a great decision. We have learned a lot and also had a great time there. We can honestly recommend it to everyone.
